WORK EXPERIENCE

Engineering/GIS Technologist, City of Kingston | April 2025 – Present

GIS Coordinator, City of Kingston | July 2023 – April 2025

- Developed FME workbenches and SQL queries to automate tasks, reduce manual work, and improve report accuracy, including generating provincially required reports, identifying housing supply and residential density, and mapping Kingston's residential development pipeline
- Migrated automated map generation scripts from ArcMap to ArcGIS Pro, improving code readability and error handling
- Edited spatial planning data, and civic addressing data within an SDE environment and provided mapping support for planners
- Published layers to AGOL/Portal, and created online viewers and Experience Builder apps

Research Assistant, H2O Geomatics | September 2022 – December 2022

- Improved classification accuracy of a lake ice detection algorithm by collecting and preparing training data
- Wrote a program to assess the accuracy of the algorithm by training a random forest and assessing the accuracy using 5-fold cross-validation
- Automated processes such as sampling raster values, producing box plots, or calculating brightness temperature with Python scripts

Geomatics Technician, Agriculture and Agri-Food Canada | January 2022 – April 2022

- Developed R scripts to convert field data into input-ready data for a soil moisture prediction model
- Executed the soil moisture prediction model, and presented results using graphs to compare model estimates to measured values
- Improved soil moisture model accuracy by modifying the calculations for total soil moisture, adding gap filling features, and removing invalid data entries

Remote Sensing and Spatial Analyst, University of Waterloo | September 2020 – December 2020

- Calculated urban to rural ratios by reclassifying raster land-use data, then using zonal statistics to count urban and rural pixels
- Categorized land ownership parcels by land use type in QGIS, to be used in further analysis of carbon storage
- Communicated my work processes in clear methodologies to be followed by future co-op students

GIS Technician, Ministry of Transportation Ontario (MTO) | January 2020 – April 2020

- Maintained the MTO's spatial database by digitizing or editing road and structure contracts and modifying relevant attribute data in QGIS to make data accessible to other sections at the MTO
- Created road alignment drawings in AutoCAD Civil3D by interpreting planning diagrams and using reference bars, to enable chainage referencing along roadways and provide a baseline for future survey work

EDUCATION

Bachelor of Environmental Studies (Geomatics), Computing Minor

University of Waterloo, September 2018 – April 2023

- Relevant Courses: Advanced GIS, Spatial Analysis, GIS Term Project
- Awards:
 - AOLS Educational Foundation Academic Excellence in Geomatics Award, awarded annually to 2 Geomatics students selected by UW based on academic success
 - University of Waterloo President's Scholarship for 90-95% admission average

COMPUTER PROFICIENCY

- Experienced with the programs: ArcGIS, AGOL/Portal, ArcCatalog, FME, SketchUp, Geomatica Catalyst, QGIS, AutoCAD, PostgreSQL, Blender, Microsoft Office (Word, Excel, SharePoint, PowerPoint, Outlook, Teams), Adobe
- Experience with the programming languages Python, SQL, Arcade, R, Java, and C
